

Task 4: Customer Data Analysis

CodSoft Data Analytics Internship

This report segments 1,000 customer orders by age, location, and spend to understand purchasing behavior and identify the most valuable customer groups, with marketing recommendations based on the findings.

1. Segmentation by Age Group

Age Group	Customers	Orders	Revenue (Rs.)	Avg Order (Rs.)
Teen (<18)	75	83	413305.0	4980.0
Young Adult (18-25)	131	155	490591.0	3165.0
Adult (26-35)	264	341	1358332.0	3983.0
Mid-Age (36-45)	228	287	1229062.0	4282.0
Senior (46-55)	98	112	446035.0	3982.0
Elder (55+)	22	22	88655.0	4030.0

2. Segmentation by City (Top 5)

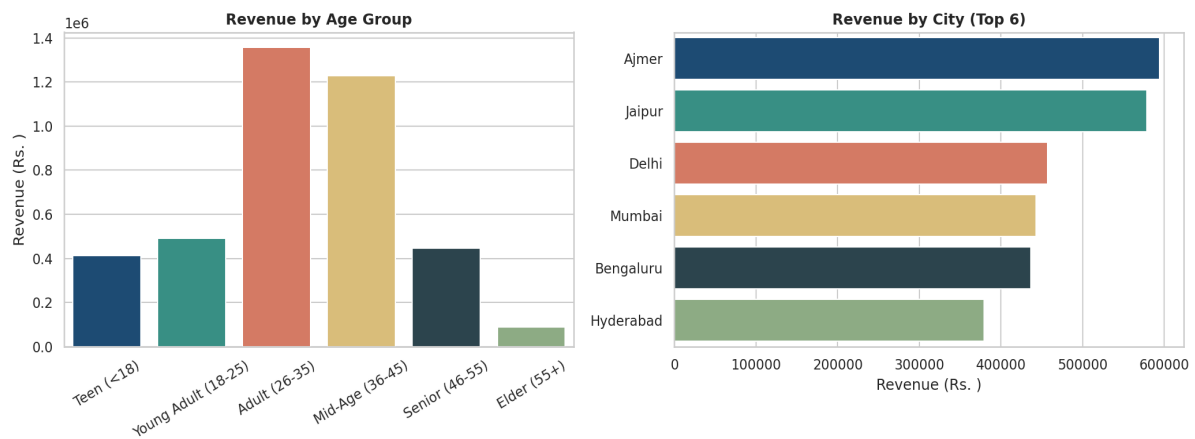

City	Orders	Revenue (Rs.)	Avg Order (Rs.)
Ajmer	149	594188.0	3988.0
Jaipur	126	578688.0	4593.0
Delhi	114	456834.0	4007.0
Mumbai	114	443148.0	3887.0
Bengaluru	109	436849.0	4008.0

3. Customer Value Tiers

Tier	Customers	Avg Spend (Rs.)
Low Value	159	1391.0
Mid Value	158	4798.0
High Value	159	19162.0

Customers are split into three equal-sized groups by total spend. High Value customers spend roughly 14x more on average than Low Value ones.

4. Visual Summary

5. Key Insights

- 'Adult (26-35)' age group contributes the most revenue overall.
- 'Ajmer' is the top-performing city by revenue.
- 159 customers fall in the High Value tier, averaging Rs. 19,162 spend each.
- Repeat, high-frequency customers are concentrated in the High Value tier, showing loyalty programs would have the most impact there.
- Clothing is the top category for most age groups; Electronics leads among teens, mid-age, and elder customers.

6. Suggested Marketing Strategies

- Launch a loyalty/rewards program targeted at High Value tier customers to boost retention.
- Run targeted promotions for the 'Adult (26-35)' segment (early access, bundled offers) since it drives the most revenue.
- Increase local marketing spend in 'Ajmer' and other top cities where demand is already proven.
- Use re-engagement campaigns (discount coupons, reminders) to convert Low Value customers into repeat buyers.
- Promote UPI-based offers at checkout since it is the most-used payment method, reducing friction.
